

What Does It Take to Enrich Learning and Create a Stronger School Environment?

Join us to examine the challenges you face and the education success stories you can learn from.

Take your place at the Education Summit on April 4

Be part of a discussion that addresses today's most pressing education issues, as well as look at what's soon to be top of mind for educational leaders. We will examine the ways your district can enhance the learning experience for all children and create stronger bonds with your community.

Learn the key role technology plays in improving academic performance and administrative efficiency to understand how you can:

- Create an engaging, media-rich education experience that fosters better learning.
- Enhance staff development and training to attract and retain top people.
- Improve communications with parents and your community to strengthen support and involvement.
- Reduce costs and complexity using solutions that simplify and eliminate multiple administrative systems.
- Ensure safer classroom environments.

Hear Cisco Education Expert **Renee Patton** share best practices and success stories from districts like yours.

She is an expert in trends driving educational transformation and those technologies that are most impacting the evolution of the 21st century school.
