What our customers and partners are saying:

"Profit per square foot of rack space and profit per employee are critical in our business. Ensim ServerXchange™ allows us to maximize revenue and profits for every server, in every rack, in our data center."

Haralds Jass – President and CEO, Superb Internet

"Ensim makes it possible for Digital Island to redefine the way content and applications are delivered to the edge of the network."

Allan Leinwand – CTO, Digital Island

"Ensim ServerXchange™ gives us a big competitive differentiation in the market place. Our reseller customers can provision and manage their own web hosting services and be assured of the highest quality-of-service available in the industry."

Alan Tone – Founder and President of Technology, Infinity Interactive

"Ensim ServerXchange™ running on Sun's Carrier Grade Network Computing Platform delivers a hosting infrastructure that enables service providers to profitably provision, host, and manage a broad range of application services for their rapidly growing subscriber bases."

John McFarlane – Senior Vice President, Sun Microsystems
